for a

No-Contact Outdoor Newborn Session

No 1

TEACH THE PARENTS HOW TO SWADDLE BEFORE THE SESSION.

Swaddling for a newborn session is very tedious. If not done properly, the baby won't stay calm for the session. To prepare the parents for the session, have them practice swaddling!

"Practice makes Perfect"

No 2

Shoot the session at or close to the parent's home. That way they have access to indoors while you set up and during the session if needed.

No 3

Set your props up with bolsters and wrap/headpiece choices before you leave your home. That way they are ready to be setup at the session.

No 4

HAVE EVERYTHING SET UP AT YOUR SESSION LOCATION BEFORE THE BABY IS SWADDLED.

- Backdrop for parents
- Props and setups for baby ready to shoot
- Other wrap options and headbands for parents to add-on during session

No 5

Have a "fake" baby with you so you can walk the parent through the "how-to" swaddle properly while staying at least 6' away.
